

FROM TAURANGA TO THE WORLD DRAINAGE SOLUTIONS FOR SPORTS FIELDS

TRENCHIT DESIGN, MANUFACTURE AND SELL MACHINERY ENGINEERED SPECIFICALLY FOR THE DRAINAGE OF SPORTS FIELDS, TURF PLAYING SURFACES AND AGRICULTURAL & HORTICULTURAL LAND THROUGHOUT NEW ZEALAND AND EXPORT WORLDWIDE. ALL OUR PRODUCTS ARE DESIGNED AND BUILT IN TAURANGA, NEW ZEALAND, AND WITH OVER 30 YEARS OF EXPERIENCE IN THE INDUSTRY WE ARE PROUD OF OUR REPUTATION TO BUILD QUALITY EQUIPMENT. **TRENCHIT** IS A FAMILY OWNED BUSINESS THAT STRIVES TO IMPROVE PRODUCTIVITY FOR OUR CUSTOMERS AND EXCEED THEIR EXPECTATIONS.

TCT FAIRWAY AT AKARANA GOLF COURSE

When I took over at Akarana Golf Club we had a good course for 9 months of the year. The winters here were really rough, we struggled just to get the course mown, we would have mowers get stuck each day. We tried to use contractors to install drainage but for the amount of work we required it was going to cost hundreds of thousands of dollars to get it completed and for a club like ours probably would've taken over 10 years to complete. So, we investigated the idea of purchasing our own drainage equipment and after many committee meetings we decided to do a live demo with the TCT Fairway Trencher with our members invited along. After they saw the trencher in action it was an easy decision and the club purchased the trencher!! That was 2014, since then we have installed close to 10,000 meters of drainage into the course, and we are now truly playable 365 days a year. Probably one of the best investments the club has ever made.

STUART BAIRD – COURSE SUPERINTENDENT

Good management of drainage systems is essential to save money and protect the environment, so implementing an efficient drainage system will help prevent damage to crops or grazing land, sportsfields & golf fairways. With quality drainage systems, excess surface water is quickly drained away and is widely accepted as being beneficial to crop and soil management. Whatever your drainage requirement there is a Trenchit machine that can help you tackle the job.

TCT Pro Trencher & TCT Fairway Trencher's with Conveyors have been designed specifically for the sports and turf industries. A chain trencher that provides a complete soil clear up system and a tidy trench. The soil is elevated up using a conveyor system and deposited onto a running vehicle alongside the machine, thus ensuring clean up time is minimal.

TCT Ag Trencher is ideal for agricultural and horticultural drainage projects.

SGH Hopper is designed to work alongside trenchers and backfill trenches with sand or gravel, quick, easy & effective.

TWT550 Trencher & TWT400 Trencher with Conveyor's are tractor mounted wheel trenchers with a conveyor attachment. You are left with a clean and tidy trench ready to lay pipe or other services.

Being three point linkage trenchers makes them easily removable to fit other attachments to your tractor meaning you are not tying up a whole tractor unit just for trenching.

Trenchit trenchers are suitable for cutting the narrowest trench possible, which improves your productivity by reducing the costs of backfilling.

TCT FAIRWAY AT HUAPAI GOLF CLUB

We purchased the TCT Fairway Trencher and Conveyor in 2018. Since then it's totally transformed our course during the winter months. We managed to install around 4 kilometres of drainage. The machine is perfect for our situation, very robust, reliable and parts are very accessible. Matt and the Trenchit team are also excellent to deal with. Three years on we are really reaping the benefits

MATT CHATTERTON – COURSE SUPERINTENDENT

TCT FAIRWAY AT WAINUI GOLF CLUB

With many controlled rough areas unplayable throughout winter, having drainage equipment on tap has made it easy to install drainage when we want to. The added bonus for the club has been a significant reduction of previously assigned sand-capped entrance/egress areas. This equipment has effectively already paid for itself

SIMON BURROWES – COURSE SUPERINTENDENT

We manufacture a wide range of equipment, we can also design and build a specific machine for your requirement. We are well known for building tough robust equipment for many happy customers in New Zealand and throughout the world! Get in touch today.
